

## Corn Oil Plus 2l & Omega Coat 2l

This cold pressed oil provides supplementary essential fatty acids for horses. It helps in reducing excitability in horses fed high grain content diets. It aids in maintaining a healthy skin and glossy coat. It is a conditioning agent and energy supplement. It also helps to reduce the negative effects of heat in hot weather. Recommended feeding 60ml per day. Size: 2l.

Omega Coat helps to maintain a horse's healthy skin and coat and aids in helping to control inflammation. Omega Coat contains essential fatty acids which cannot be synthesized or synthesized in sufficient quantities by the body and must be supplied through diet. Every living cell in the body needs essential fatty acids as they are crucial for rebuilding new cells. Omega Coat contains Canola/Flaxseed oil which helps to keep inflammation under control by promoting anti-inflammatory processes. The consumption of flaxseed oil may have additional benefits in aiding recovery by reducing post exercise soreness and muscle tightness while helping to support the immune system. The product also contains Soya/Evening primrose oil and Corn Oil to provide a source of unsaturated long chain fatty acids. Feed 60ml per horse per day. Sizes: 2l.

## SUPER CODLIVINE 2.5KG

Super Codlivine is an oil and vitamin iodised feed supplement for horses and ponies. It contains: Vitamins - A, D, E, K, B1, B2, B12, and C. Amino acids - Folic acids, Pantothenic acids. Minerals - Biotin, Niacin, Choline, Inositol, Copper, Magnese, Zinc, Cobalt, Iodine, Magnesium, Selenium, Sulphur, Potassium, Calcium, Phosphorous, Argenine, Histidine, Lysine, Methionine and Anti-oxidants. It may also contain a sprinkle of horse feed however no salt is added to the mixture. It is ideal for weight gain and healthy coats without creating excess energy. Most horses require 65g per day therefore a 2.5kg tub will last one horse about 38 days. Size: 2.5kg

## RED CELL

The "Industry Standard" vitamin-mineral supplement for fuelling champion horses. When second best is not enough. Red Cell, the world leader in vitamin and mineral feed supplements, is regularly updated to offer the maximum benefit from the latest research. Red Cell provides the most potent iron rich source of blood building ingredients available. Any horse being prepared for competition will benefit from the No.1 feed supplement. Contains 300mg of chelated iron per ounce. Potent, reliable and homogenized for maximum consistency. Yucca flavouring for added palatability. Feed: Horses in training: 50ml (2 fluid ounces) per day. Horses not in training: 25ml (1 fluid ounce) per day.

## EQUISUPREME ELECTROLYTES 1KG

Equisupreme Endurolytes has been scientifically formulated to replace the salts lost in sweat, aiding in the prevention of dehydration and associated metabolic disorders. Always ensure that the horse has access to fresh, clean water and do not add the supplement to the horse's drinking water as this will decrease water consumption and therefore be counterproductive. Endurolytes can also be mixed with apple sauce or yoghurt at a rate of 60g to 60ml and administered as a paste. Feed 30g once a day for light work, 60g once a day for moderate work and 90g - 120g once a day for intense work. Sizes: 1kg.

## GARLIC POWDER 1KG

Garlic supplements the normal diet of animals and helps produce a better state of health. Its pungency discourages ticks, fleas, flies, midges and intestinal worms. It also detoxifies and strengthens the immune system. It can lower blood pressure and improve digestion. Feed: 15g per day. Size: 1kg.

## KIEFFER HORSE TREATS

Nutritious and highly palatable, these apple flavoured horse treats are ideal for rewarding your horses after hard work or for simply spoiling them on their off day. Flavours: Apple and Banana.

## HORSE WHISPERS

A vitamin E enriched baked treat for horses.

## HORSE SALT LICKS

This mineral supplement is made from pure compacted sea salt imported from Namibia. Due to a horse's innate ability to know when he needs salt, a salt lick should be present in his feed bin at all times. Especially important for horses in hard work or horses working in hot climates. Size: 2kg
